Month of April began in the grip of peak second wave of Covid19. Much stricter lockdown than last year and series of rumours through social media created a panic wave amongst the villagers. Loose-talk that vaccine can cause death or blindness or impotence, generated a wide spread vaccine hesitancy.

Our team saw this as an opportunity. The social workers and community health workers went from village to village, door to door to answer every question and dissolve the fears. In addition, formal & informal village meetings and continuous awareness programs resulted in reducing the hesitancy. Consequently, more than 50% of our villages are near 100% vaccinated. This is quite an achievement.

While vaccination was the top-priority, our regular activities i.e. Antenatal care, Postnatal care, Malnutrition, adolescent girls’ programs, Education, Self Help groups etc. continued in spite of severe lockdown.
