The community is seeing a steep rise in mentally fragile people, people who break down with varying degrees of severity. There is poor infrastructure for their health-care, due to poverty of awareness and of commitment.

MLD Trust has created a unique opportunity of *wholistic, homoeopathic* health-care for patients who are mentally disturbed. We are extending our hands for the one in need, so that, together, with love, care and compassion we can bring about a change and make this world a better place to live in.
